

Campground Visual Assessment Report

10/6/2016

3 campsites were visited: Buckhorn Recreation area (Black Butte Reservoir), Red Bluff Recreation Area, Woodson Bridge Campground.

24 different camps were assessed in all, 20-R.V. campers and 4 Tent campers.

There were several various Household Hazardous Waste items found at each camp. Varying from propane cylinders to aerosols to common household cleaners, etc..

Large refillable propane cylinders – 20

Small disposable propane cylinders – 11

Aerosols (bug repellent, sun block) – 20

Additional HHW products (soaps, cleaners, citronella candles, etc.) – 37

Notes:

Upon speaking with the campers it was discovered that most were planning on taking their items home with them due to the fact that they weren't quite empty. When asked about how to properly dispose of the items most were unsure. None of the campers with the disposable propane cylinders were aware of how to properly dispose of their empty containers.
