

Patrick Holland, P.E.
Senior Civil Engineer
Los Angeles County Department of Public Works

Patrick Holland joined Los Angeles County Department of Public Works in 2003. He has been a registered Professional Engineer in the State of California since 2006. In his current role, Patrick leads a team in the Planning and Policy Development Section. He and his team analyze legislation pertaining to solid waste and recycling; review and prepare comments on various policy documents; manage the County's Conversion Technology Program that focuses on non-combustion alternatives to landfills to manage post-recycled waste; and develop multiple waste reduction programs. Patrick spent several years working in stormwater management where he focused on increasing flood protection, expanding water conservation, and improving water quality. Patrick holds a Bachelor of Science in Civil Engineering from Utah State University and a Master's in Business Administration from California State University, Long Beach.
